SUMMARY

Security-focused engineer with hands-on expertise in penetration testing, Zero Trust architecture, and vulnerability assessment. Skilled at building encrypted, access-controlled systems using Burp Suite, Metasploit, Nmap, and Wireshark — identifying and mitigating real-world threats across web and network environments.

TECHNICAL SKILLS

Languages: Python, Bash, SQL, HTML
Frontend & Web: React.js, JavaScript, Tailwind CSS
Backend & APIs: Node.js, Express.js, REST APIs **Databases:** MongoDB
Cybersecurity Tools: Wireshark, Nmap, Burp Suite, Metasploit, Nessus
OS & Infra: Linux (Kali), VirtualBox, Git
Concepts: Penetration Testing, Vulnerability Assessment, Zero Trust Architecture, Cryptography, Digital Forensics, Network Security, OSI Model, Firewalls

EXPERIENCE

Interns Veda

■ System Security Tester Intern

June 2024 – July 2024

- Conducted hands-on vulnerability assessments and penetration testing across client systems, identifying and documenting 15+ critical security misconfigurations.
- Performed in-depth security log analysis to detect anomalies and potential intrusion attempts, reducing undetected threat surface.
- Simulated real-world attacker behavior using Metasploit, Nmap, and Burp Suite to strengthen client defenses in controlled environments.

PROJECTS

Zero Trust File Sharing System

- Architected a production-grade secure file sharing platform on Zero Trust principles — continuous identity verification, zero implicit trust at any layer.
- Implemented JWT + TOTP-based MFA, PIN-wrapped key management, and AES file encryption — eliminating unauthorized access and data exfiltration risks.
- Enforced Role-Based Access Control (RBAC) and mitigated OWASP Top 10 threats including broken access control and cryptographic failures through security-first design.

EDUCATION

K.R. Mangalam University, Gurugram, Haryana, India

- *B.Tech in Computer Science & Engineering (Cybersecurity Specialization)* 2023-2027

SH SN Sidheshwar Public School

- *Higher Secondary Education (12th)* 2023

SH SN Sidheshwar Public School

- *Secondary Education (10th)* 2021

CERTIFICATIONS

- Certified Cybersecurity Technician (CCT) – EC-Council
- Network Defense Essentials (NDE) – EC-Council
- Android Bug Bounty Hunting: Hunt like a Rat – EC-Council
- SQL Injection Attacks – EC-Council
- Data Analysis with Python – IBM
- Self-directed Emotional Learning for Empathy and Kindness – UNESCO MGIEP

ACHIEVEMENTS & ACTIVITIES

- Member of KR Mangalam Cybersecurity Club — contributing to peer learning and security awareness initiatives.
- Competed in Capture the Flag (CTF) challenges on TryHackMe and Hack The Box, sharpening offensive and defensive security skills.
- Participated in Hackathon organized by KR Mangalam University and Cyber Challenge 2025 at college.
